Sun-Earth Day 2010
Magnetic Storms!

Explore electricity and magnetism and see how they are the key to our understanding of the Sun and its violent storms! A large flare releases a million times more energy than the largest earthquake.

Questions to ask:

What is the structure of the Sun?

How do we predict a solar storm?

What is space weather?

What is the role of magnetism in space weather?

How does space weather affect Earth?

Does space weather affect other planets?
