

Hey, guess what, I'm Galileo. And you know what? Four hundred years ago this year, I became the proud father of astronomy. I invented the telescope, I looked through it, and then I changed the world.

-Telescope is so simple, even my husband can figure it out.

- I'm using a telescope right now. And now through this super exclusive offer, you can get all of my greatest discoveries. Like sunspots, the phases of Venus, moon craters, moon mountains, Jupiter's moons, the Leaning Tower of Pisa thing that changed--

You're welcome, science!
